#7 LEGAL REQUIREMENTS

CLICK ANY CHECKBOX TO POPULATE FORM

What is BOCA Code for Swimming Pools?

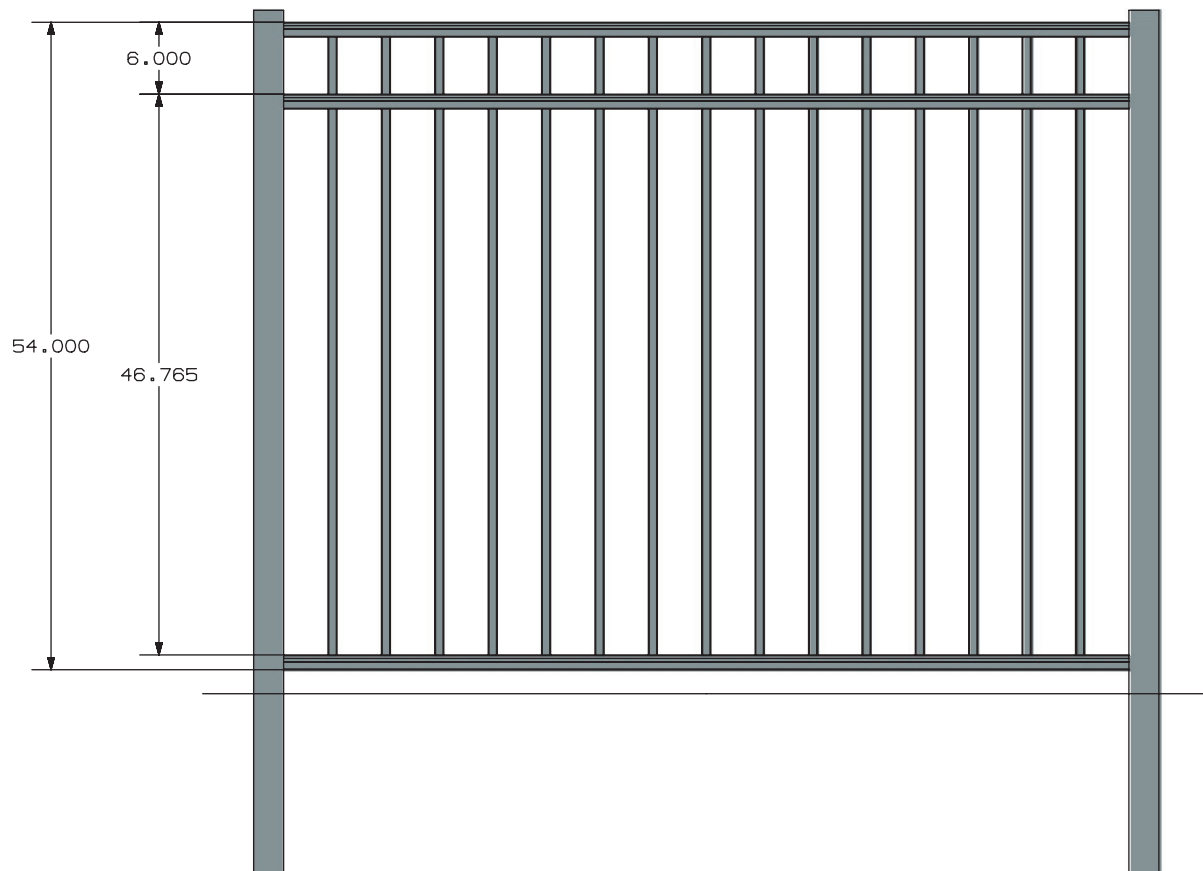

Ultra Aluminum™ designs fencing to meet all pool safety codes

"Flush" is when the bottom rail encloses the bottom of the pickets, so no pickets are exposed.

NOTE: Always check local municipality for code before ordering and installing pool fencing.

- Fence must be at least 48" (4 ft) tall.
- Must be at least 45" between any 2 rails.
- The spacing between pickets must be less than 4".
- The space between the bottom rail and the ground must be less than 4".
- Gates must be self-closing, self-latching, and open outward (away from the pool area).
- The opening mechanism of the latch must be at least 54" above ground.
- Ultra Aluminum™ assumes no liability for improper installation. Code compliance is the sole responsibility of contractor.

Most Common Pool Fence: UAF-200 54" Flat Top - Flush Bottom

Yes, I need to comply with BOCA

No, I do not need to comply with BOCA

#9 PANELS (SECTIONS)

Standard Panels Width are 6'. Residential also available in 5' and 7'. Commercial and Industrial are also available in 8'.

Rackability is a feature in which allows a fence to follow the lay of the land – both on inclines and declines.

This service requires no special drawings, but should be clearly called out on your purchase order.

Standard (0" - 6")

Racking will be impacted when using the 01 Series or Short Pickets.

Rackable (0" - 20")

Heavy Rack (0" - 36")

Needs Double Punched Posts.
Not available for the 01 Series
or Short Pickets.
